

Jaros Delivers Jaros Analytics for Oracle E-Business Suite

Exclusive interview featuring Jaros Technologies' Paul Scheibal

Denver, CO (PRWEB) October 27, 2008 – Paul Scheibal, President and CEO of Jaros Technologies Corporation recently participated in an exclusive interview with Mary Jo Nott and the BeyeNETWORK (www.BeyeNETWORK.com). In this interview, Scheibal explains what Jaros Analytics is and defines packaged solutions, custom-built reporting solution challenges, customer experiences and the future for packaged solutions.

“Jaros Analytics is a complete reporting solution for Oracle E-Business Suite that can get an E-Business Suite user 80 percent functionality out of the box,” says Paul Scheibal, President and CEO of Jaros Technologies Corporation. “This includes a prebuilt, industry-specific data model with a near real-time operational data store and a consolidated set of data marts as well as Informatica mappings and an active metadata repository that provides a framework for extending and growing the solution.”

“Implementing an effective reporting solution can be challenging for most companies,” says Mary Jo Nott, Executive Editor of the BeyeNETWORK. “Jaros Analytics for Oracle E-Business Suite includes reporting and dashboarding capabilities based on a data warehouse infrastructure for a wide variety of business intelligence analytical applications.”
